About Us

DentryX is focused on developing high-performance solutions that uphold the highest standards of quality, innovation, and reliability in modern dentistry.

Trusted durability for challenging endodontic cases.

At DentryX, we are proud to be a leading Turkish manufacturer of high-quality dental materials, dedicated to empowering dental professionals with reliable, innovative, and efficient solutions.

With a passion for precision and patient care, we design and produce materials that meet the highest international standards, ensuring both clinical excellence and user satisfaction.

Our journey began with a simple goal: to support the dental industry with products that make a difference. Today, we continue that mission through continuous R&D, state of the art production technologies, and a commitment to sustainability and safety. With a growing global presence, DentryX exports to over 30 countries and collaborates with industry professionals worldwide. Every product we create reflects our core values, quality, trust, and innovation.

We don't just manufacture dental materials, we build partnerships, inspire confidence, and contribute to brighter, healthier smiles around the world.

DentryX Nano Composite

DentryX Nano is a radiopaque nanohybrid composite material that can be utilized in both anterior and posterior tooth restorations.

- Features:**
- Radiopaque Nano Hybrid Composite
 - Due to the presence of nano fillers, it exhibits light reflection properties similar to those of a natural tooth.
 - High filler rate.
 - Highly polished.
 - Excellent wear resistance.
 - Provides ease of use.

- Packing Options:**
- Refill - 4 gr in a syringe
 - Kit - 4 gr syringe x 6 pcs. + 1 pcs. 5 ml DentryX Bond + 1 pcs. 3 ml DentryX Etch + Accessories
 - Shades – A1 – A2 – A3 – A3,5 – B1 – B2 – OA2 – Extra Bleach

DentryX Flowable Composite

DentryX Flow is a flowable, light-activated, radiopaque composite resin.

- Features:**
- Low shrinkage, low wear
 - Capability for superior surface shine
 - Highly aesthetic dental restorations
 - Exceptionally fine surface texture
 - Excellent handling
 - Low stickiness
 - High-quality marginal adaptation

- Packing Options:**
- Refill – 2 gr in a syringe
 - Kit 1 - 2 gr in a syringe x 2 pcs.
 - Kit 2 - 2 gr in a syringe x 4 pcs.
 - Shades – A1 – A2 – A3 – A3,5 – B1 – B2 – OA2 – Extra Bleach

DentryX Flow Bulk Fill

Flowable Bulk-Fill Composite
Flowable bulk-fill composite designed for Dental restorations which can be used in posterior teeth with the bulk fill technique. Thanks to its excellent flow properties, the material adapts seamlessly to the cavity walls.

- Features:**
- Filling up to 4 mm
 - Different colour options
 - Low shrinkage
 - Improved mechanical performance
 - Single layer
 - Easy handling radiographic contrast

- Packing Options:**
- Refill – 2 gr in a syringe
 - Kit 1 - 2 gr in a syringe x 2 pcs.
 - Kit 2 - 2 gr in a syringe x 4 pcs.
 - Shades – A1 – A2 – A3

DentryX Compomer

A light-curing compomer restorative designed for optimal fluoride release and excellent cavity adaptation. Ideal for pediatric applications, it's perfectly suited for deciduous teeth restorations, moderate Class I and II restorations, and anterior Class III fillings.

- Features:**
- Delivers high and sustained fluoride release for long-lasting protection
 - Ensures effortless and dependable adaptation to cavity walls
 - Radiopaque
 - Offers high durability with outstanding abrasion and compressive strength

- Packing Options:**
- 4g in a Syringe Shade: A1, A2, A3, A3.5, B1, B2, Purple, Green, Blue, Pink, Orange, Red, Silver
 - Kit 1: 0,25g x 20 pcs compule mixed shade pack
 - Kit 2: 0,25g x 40 pcs compule mixed shade pack

DentryX Compomer Flow

DentryX Compomer Flow is a light-curing, flowable compomer restorative that delivers high and sustained fluoride release. Engineered for smooth and dependable cavity adaptation, it is the ideal solution for restoring primary teeth, moderate Class I and II restorations, and anterior Class III cavities.

- Features:**
- Delivers high and sustained fluoride release for long-lasting protection
 - High Fluoride Release: Provides long-term fluoride release for added protection
 - Radiopaque: Facilitates clear visibility under radiographic examination
 - Easy Polishing and Modeling: Simplifies the finishing process for a smooth and aesthetic result.
 - Offers high durability with outstanding abrasion and compressive strength

- Packing Options:**
- 2g in a Syringe Shade: A1, A2, A3, A3.5, B1, B2, Purple, Green, Blue, Pink, Orange, Red, Silver

DentryX Bond Adhesive System

DentryX Bond is a light-cured, single-component 5th generation bonding agent designed for adhesive restorations. It is universal and works compatibly with all types of composite materials.

- Features:**
- Superior Adhesive Strength: Provides a reliable and long-lasting connection between the restorative material and the tooth structure
 - Exceptional Bonding to Dentin and Enamel: Delivers outstanding attachment, supporting the durability and secure placement of the restoration.
 - 5th Generation: Employs cutting-edge bonding technology to ensure dependable and uniform performance

- Packing Options:**
- 5 ml in a bottle

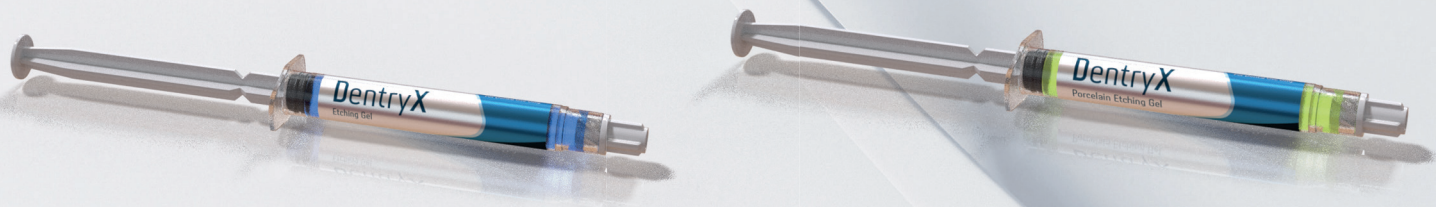

MDP monomer

DentryX SE Bond Self Etching Adhesive System

DentryX SE Bond is a self-etching, light-cured, single-component 7th generation adhesive designed for adhesive restorations.

- Features:**
- MDP Monomer: Delivers high-performance bonding strength for both enamel and dentin.
 - Self-Etching Formula: Speeds up application by removing extra etching steps.
 - Advanced 7th Generation Adhesive: Provides consistent and high-performance bonding results.
 - Time-Efficient: Simplified application process helps dental professionals to save time

- Packing Options:**
- 5 ml in a bottle

DentryX Etching Gel

It eliminates the smear layer and creates a micro-roughened surface on enamel and dentin, ensuring ideal conditions for enhanced adhesion of the bonding agent and restorative material to the tooth structure

- Features:**
- Easily rinsed material which ensures a clean surface
 - %37 Phosphoric Acid
 - Effective surface etching and provides bond strength enhancement between the tooth surface and restorative material

- Packing Options:**
- 3 ml syringe
 - 3 ml syringe x2
 - 3 ml syringe x4
 - 50 ml syringe

DentryX Etch HF Porcelain Etch

%9.5 Buffered Hydrofluoric acid gel which improves the mechanical bonding of adhesive agents to porcelain surfaces.

- Features:**
- Greatly prepares porcelain surfaces for bonding
 - pH-balanced formula
 - Easily rinsed formula

- Packing Options:**
- 3 ml syringe
 - 3 ml syringe x2
 - 3 ml syringe x4
 - Porcelain repair kit - 3 ml syringe + silane

DentryX Liner with Glass Ionomer

Light-cured, glass ionomer-based cavity liner designed to protect the dental pulp. It is suitable for use beneath both direct and indirect restorations, such as composites, amalgams, ceramics, and other metal-based restorations.

- Features:**
- High biocompatible performance
 - Provides continuous fluoride release
 - Radiopaque
 - Superior handling properties

- Packing Options:**
- 2 gr syringe
 - 2 gr syringe x2
 - 2 gr syringe x4

DentryX Cal LC Calcium Hydroxide

Advanced light-cured calcium hydroxide for effective pulp protection and reliable liner performance beneath dental fillings. Ensures long-lasting pulp health and easy application for superior restorative results.

- Features:**
- Direct & indirect pulp capping
 - Light curing
 - Single Component

- Packing Options:**
- 2 gr syringe
 - 2 gr syringe x2
 - 2 gr syringe x4

DentryX Calcium Hydroxide Liner

DentryX Calcium Hydroxide Liner is a two-component, self-curing material specifically formulated for pulp capping.

- Features:**
- Low Solubility: Maintains structural integrity and long-term performance by resisting degradation over time.
 - High Compressive Strength: Delivers strong mechanical support and long-term durability beneath restorative layers.

- Packing Options:**
- 10g Dual Syringe and Mixing Spatula

DentryX Composite Polish Paste

Composite Polish Paste is a premium aluminum oxide-based polishing paste created to deliver the perfect final polishing on composite restorations. Its superior quality guarantees a brilliant gloss and ultra-smooth surface, boosting the natural beauty and aesthetic appeal of every dental restoration.

- Features:**
- Outstanding Restoration Shine: Provides a brilliant glossy surface that significantly improves the visual appeal of composite restorations.
 - Thixotropic: Exhibits thixotropic properties, ensuring smooth application and easy handling
 - Ideal Viscosity: Ensures perfect texture for accurate and efficient polishing results
 - Effortless Application: Engineered for user-friendly use, streamlining the polishing process for quick and effective results.

Packing Options:
-2g in a Syringe

DentryX Try-in Paste

DentryX Try-in Paste is a glycerine-based gel formulated for prosthetic works and as an effective oxygen-inhibition barrier. It prevents the formation of the oxygen-inhibited layer on resin surfaces during polymerization, ensuring a fully cured surface and optimal aesthetic and mechanical outcomes.

- Features:**
- Easy Application: Engineered for smooth handling and effortless placement.
 - Easily Rinsable: Allows quick and effortless cleanup.
 - Optimized Viscosity.

Packing Options:
2g in a Syringe

DentryX Pit and Fissure Sealant

Light-Cured, Fluoride-Releasing Sealant: Specifically formulated for occlusal surfaces, this preventive solution offers long-lasting protection by sealing pits and fissures while continuously releasing fluoride to help guard against cavities.

- Features:**
- Fluoride Releasing
 - Radiopaque
 - Convenient application
 - Low polymerization shrinkage

Packing Options:
2 gr syringe
2 gr syringe x2
2 gr syringe x4

DentryX Pattern Resin

Pattern Resin is a light-curing, single-component resin specially formulated for secure fixation of implant transfer parts and precise modeling.

- Features:**
- Optimal flow consistency: Provides effortless application and superior adaptation to detailed areas.
 - Complete burnout with zero residue: Delivers flawless and clean results.
 - Clear blue coloration: Ensures straightforward application and accurate verification.
 - Exceptional Stability: Delivers consistent, reliable performance every time.
 - No Breakdown: Provides integrity throughout the procedure

Packing Options:
2g in a Syringe

DentryX Orthodontic Adhesive

DentryX Orthodontic Adhesive is a premium light-cure adhesive specially formulated for orthodontic bracket bonding. Its exceptional bond strength significantly reduces bracket debonding, while the MDP-enriched bonding primer enhances both mechanical and chemical adhesion for durable, reliable performance.

- Features:**
- Easy Handling: Designed for effortless and precise application.
 - Durable color retention: Keeps the original shade bright and beautiful over time.
 - Superior bond strength: Delivers strong, lasting adhesion that minimizes bracket detachment.
 - Efficient light curing technology: Delivers fast, precise curing for better workflow.

- Packing Options:**
- 3,5g in a Syringe
 - Complete Kit: 1 x 3.5g in a syringe + 5ml bonding primer + 3ml etching gel

DentryX Ortho Blue

DentryX Ortho Blue is a light-cured, radiopaque composite specially formulated for anterior and posterior bite elevation as well as orthodontic band cementation. With its excellent consistency and easy handling, this versatile material is perfect for temporary dental disocclusion and a wide range of orthodontic procedures.

- Features:**
- Effortless Handling: Provides seamless and accurate application.
 - Temporary bite adjustment: Ideal for creating short-term occlusal modifications during orthodontic care.
 - Superior consistency: Ensures dependable results with effortless application.

- Packing Options:**
- 4g in a Syringe

DentryX Zinc Oxide Eugenol Cement

DentryX Zinc Oxide Eugenol Cement provides high-quality temporary filling solutions with excellent sealing capabilities, making it indispensable in dental treatments.

- Features:**
- Temporary Restoration: Designed for short-term use with dependable and lasting results.
 - Reliable Root Canal Seal: Provides a secure barrier to prevent leakage and contamination
 - Effective Root Canal Filling: Ensures stable and reliable sealing of root canals.
 - Radiographic Contrast: Enhances visibility on X-rays, facilitating precise evaluation and verification.
 - Versatile Base and Liner: Suitable for application beneath permanent restorations to provide support and protection.
 - Effortless Mixing: Enables a smooth and uniform blend for accurate application

- Packing Options:**
- 45g Powder and 15ml Liquid and accessories

DentryX Luting Cement

Formulated for strength and simplicity, DentryX Luting is a high-performance, biocompatible luting cement designed for secure placement of metal and porcelain fused to metal restorations. Its radiopaque, easy-to-mix formula ensures durability, adhesion, and efficiency in every application.

Features:
Sustained Fluoride Release Formula: Provides lasting protection by releasing fluoride over time to help maintain enamel strength and oral health.
Effortless Mixing: Provides a smooth, uniform blend for accurate and consistent application.

Packing Options:
10g Powder and 10ml Liquid and accessories

DentryX L Luting Cement

Delivering both quality and value, DentryX L is a powder-liquid glass ionomer cement ideal for secure luting of metal and porcelain-fused-to-metal restorations. Its combination of durability and ease of use makes it an indispensable material for daily dental practice.

Features:
Sustained Fluoride Release: Provides continuous fluoride delivery to reinforce enamel and reduce the risk of secondary caries
Effortless Mixing: Enables smooth and uniform blending for accurate application.

Packing Options:
15g Powder and 10ml Liquid and accessories

DentryX Filling Cement

Combining strength, esthetics, and simplicity, DentryX Filling is a high-quality glass ionomer cement designed for reliable, long-lasting restorations. Its user-friendly formulation and radiopaque nature make it a must-have for modern dental practice.

Features:
Superior Esthetics: Delivers restorations with natural-looking color and translucency
Easy Mixing: The formulation allows for smooth and consistent mixing, ensuring precise application.
Enhanced Compressive Strength: Delivers superior resistance to occlusal forces and abrasion.

Packing Options:
10g Powder and 10ml Liquid and accessories

DentryX F Filling Cement

DentryX F is a cost-effective powder and liquid glass ionomer cement designed for use as a base or liner beneath restorations, offering reliable support and lasting durability.

Features:
Superior Esthetics: Delivers restorations that closely mimic the natural appearance of teeth
Higher Compressive Strength: Offers excellent resistance to pressure and wear

Packing Options:
15g Powder and 10ml Liquid and accessories

MDP
monomer

DentryX SE Cem

Self-etching, self-adhesive permanent resin cement designed for luting applications. Ideal for cementing crowns, bridges, inlays, onlays, and posts with ease and reliability.

Features:
High-performance resin system
Superior bonding power
Perfect marginal adaptation
Quick application
Top-tier performance

Packing Options:
9g dual syringe + no tip
9g dual syringe + 10 tips

DentryX Temp NE

Zinc oxide non-eugenol temporary cement supplied with an automix syringe and mixing tips. Ideal for the temporary cementation of crowns and bridges, especially suitable for patients sensitive or allergic to eugenol.

Features:
Eugenol-free formula
Convenient to use
Flawless sealing
Minimal solubility

Packing Options:
9g dual syringe and mixing spatula

DentryX Prophylaxis Paste

DentryX Prophylaxis Paste is specially formulated with advanced nano-particles, delivering superior cleaning and polishing performance for a radiant, professional finish

Features:
Nano particle technology ensures maximum cleaning efficiency, penetrating the tiniest crevices for a flawless finish
A variety of appealing flavors, including mint, strawberry, orange, and raspberry, make every treatment more pleasant for patients
Delivers exceptional cleaning and polishing performance for naturally bright, healthy smiles.

Packing Options:
30g Bottle
150g Bottle
340g Bottle
2g x 100 pcs. in a Box
2g x 200 pcs. in a Box

DentryX Hemostat

DentryX Hemostat is a 25% buffered aluminum sulfate solution formulated to control minor gingival bleeding during dental treatments. Especially effective in restorative procedures, crown preparations, and placement of bands and matrices, it is epinephrine-free, stable, and delivers rapid hemostasis, making it indispensable for dental professionals.

Features:
Epinephrine-Free Formula: Ideal for patients with sensitivities or contraindications to epinephrine.
Long-Lasting Stability: Delivers consistent performance throughout its shelf life.
Fast Hemostatic Action: Quickly stops minor bleeding to streamline clinical workflow.

Packing Options:
10ml Liquid

DentryX Temp

DentryX Temp is a premium temporary filling material formulated for reliable provisional fillings and the temporary placement of permanent crowns and bridges. Its excellent marginal adaptation ensures secure fit and clinical efficiency, making it a must-have for dental professionals.

Features:
Excellent Marginal Seal: Provides a tight, precise fit to minimize leakage and maximize patient comfort.
Self-Setting Formula: Initiates curing through moisture, streamlining application without additional steps.
Mix-Free Activation: Saliva initiates curing, streamlining the procedure and saving valuable chair time.
Eugenol-Free Formula: Ideal for sensitive patients, offering irritation-free temporary restorations

Packing Options:
30g Bottle

DentryX Office Whitening

DentryX Office Whitening is a powerful in-office tooth whitening system formulated with 35% hydrogen peroxide to deliver fast, effective whitening results. Designed for professional use, it brightens smiles quickly while minimizing sensitivity for enhanced patient comfort.

Features:

- Professional Concentration: 35% hydrogen peroxide ensures fast and visible whitening outcomes.
- Syringe Connection System: Enables accurate and effortless dispensing.
- Single-Use Efficiency: Provides noticeable outcomes with just one application.
- Minimized Sensitivity: Formulated to provide a gentle experience with less post-treatment sensitivity.
- Optimal Viscosity: Keeps the gel securely positioned for maximum effectiveness
- Easy Application: Designed for smooth and efficient use in a dental office setting.

Packing Options:

- 1 Patient Kit (1 time use of whitening system + 2g gingiva barrier)
- 2 Patient Kit: (2 times use of whitening system + 2g gingiva barrier)
- 10 Patient Kit (10 times of whitening system)

DentryX Home Whitening

DentryX Home Whitening is an easy-to-use and effective tooth whitening system tailored for at-home treatments. Available in 10%, 16%, and 22% carbamide peroxide formulations, it delivers safe, gradual whitening for a brighter smile without causing irritation or burns.

Features:

- Carbamide Peroxide Formulation: Offered in 10%, 16%, and 22% concentrations to meet diverse whitening requirements
- Easy Single Syringe Use: Offers controlled and convenient application for each procedure.
- Burn-free formula: gentle on gums for a safe and comfortable whitening process.
- Excellent Viscosity: Ensures the gel stays in place for optimal whitening performance

Packing Options:

- 1 Patient Kit: Includes a single-use whitening system available in 10%, 16%, or 22% carbamide peroxide.
- 4 Patient Kit: Includes four uses of the whitening system available in 10%, 16%, or 22% carbamide peroxide.

DentryX Gingiva Barrier

Fast-setting light-cure gingival barrier for effective soft tissue protection

Features:

- Can be effortlessly taken off after use
- Designed to ensure patient comfort by minimizing heat and tissue irritation
- Blue shade
- Ultra-fast 5-second cure

Packing Options:

- 2 gr syringe
- 2 gr syringe x2
- 2 gr syringe x4

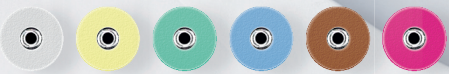

DentryX Polishing Discs

DentryX Polishing Discs are premium dental discs engineered for multiple finishing and polishing stages. Available in a range of colors indicating different coarseness levels, they ensure precise, efficient results for every dental procedure

14 mm Size: Perfectly suited for multiple dental procedures

- **White** – Extra Fine for Polishing
- **Yellow** – Fine for Finishing
- **Green** – Medium for Countoring
- **Blue** – Coarse for Gross Reduction
- **Brown** – X Coarse for Gross Reduction
- **Pink** – XX Coarse for Gross Reduction

Packing Options:
40 pcs discs and 1 mandren in a plastic box
80 pcs discs and 1 mandren in a plastic box
240 pcs discs and 4 mandrens in a plastic box

DentryX Polishing Strips

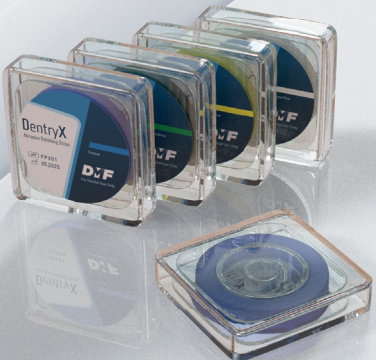

DentryX Polishing Strips offer a variety of grit sizes, combining two distinct grit types for outstanding polishing performance. These flexible, user-friendly strips are designed to deliver precise and efficient dental polishing results

Features:
Different Grit Sizes: Each strip blends two grit types for superior polishing performance
Flexible and Simple to Use: Offers smooth application and fits a variety of dental procedures.

- **White** – Extra Fine for Polishing
- **Yellow** – Fine for Finishing
- **Green** – Medium for Countoring
- **Blue** – Coarse for Gross Reduction

Packing Options:
75 pcs Strips in a Plastic Box
80 pcs Discs + 75 pcs Strips + 1 Mandren in a Plastic Box

DentryX Stainless Steel Abrasive Strips

Designed for accuracy, DentryX Stainless Steel Abrasive Strips provide exceptional finishing and polishing for a wide range of restorative materials including composites, acrylics, glass ionomers, and amalgam, ensuring long-lasting dental restorations.

Features:
Excellent Polishability: Achieves a high-quality finish that enhances the visual appeal and durability of restorations
Controlled Abrasiveness: Enables precise material removal while smoothing the surface.
Multiple Sizes Available: 4.00 mm and 6.00 mm options to accommodate a range of applications

Packing Options:
12 pcs of 4 mm per Box
12 pcs of 6 mm per Box

DentryX Wooden Wedges

Designed with an anatomical shape, DentryX Wooden Wedges provide excellent support for high-quality fillings. Color-coded for easy identification, they simplify selection and use in various procedures

- Features:**
- Superthin Short (White)
 - Thin Short (Yellow)
 - Thin Long (Blue)
 - Medium Short (Pink)
 - Medium Long (Green)

Packing Options:
5 different shapes - 100 pcs in box

DentryX Polisher

Designed for precision, DentryX Polishers offer superior finishing and polishing of composite restorations. Their high-quality structure provides a glossy, refined surface that improves both the look and longevity of dental work

Features:
Easy Attachment: Quickly mounts onto the mandrel for effortless and efficient setup
Sterilizable: Designed for autoclave use, supporting hygiene and reusability.
High-Performance Polishing: Ensures a radiant, flawless surface with every use

Packing Options:
10 pcs in a bag

DentryX Transparent Wedges

Made from high-quality transparent polymer, DentryX Wedges deliver outstanding support during fillings. Their clarity, reliability, and user-friendly design make them ideal for professionals seeking accuracy and efficiency

Features:
Exceptional Strength: Designed for long-term use without risk of breaking
Simple to Use: Facilitates quick and easy placement and removal.
Ergonomic Shape: Ensures perfect fit and reliable support throughout dental treatments.

Packing Options:
2 different shape-100 pcs box

DentryX Articulating Paper Straight

DentryX Straight Articulating Paper is a premium-quality tool designed to accurately reveal occlusal contacts and support precise bite adjustments during dental procedures.

Features:

- Non-Sticky: Allows effortless removal with no residue left behind
- Smooth Surface: Guarantees accurate occlusal readings with clean and defined markings
- Double-Sided Design: Available in vibrant blue and red colors for versatile use and easy identification

Packing Options:

80µ – Blue/Red Straight 144 pcs. Paper

DentryX Articulating Paper Horseshoe

DentryX Horseshoe Articulating Paper is a premium-quality diagnostic tool designed to identify occlusal contacts with precision. Its ergonomic horseshoe shape and 80µ thickness ensure accurate and highly sensitive bite registration for effective dental adjustments

Features:

- Non-Sticky: Allows effortless removal with no residue left behind
- Smooth Surface: Guarantees accurate occlusal readings with clean and defined markings
- Double-Sided Design: Available in vibrant blue and red colors for versatile use and easy identification

Packing Options:

80µ – Blue/Red Horseshoe 72 pcs. Paper

DentryX Calcium Hydroxide with Barium Sulphate

DentryX Calcium Hydroxide Paste with Barium Sulphate is a premium, ready-to-use, non-setting calcium hydroxide paste formulated for effective root canal and vital pulp treatments.

- Features:**
- Superior radiographic visibility
 - Quick and easy removal
 - Strongly basic pH level (>12)
 - Superior handling properties

- Packing Options:**
- 2 gr syringe
 - 2 gr syringe x2
 - 2 gr syringe x4

DentryX Calcium Hydroxide with Iodoform

Calcium hydroxide premixed paste with non-setting formula, ideal for root canal and vital pulp therapies. Includes convenient application tips for precise use.

- Features:**
- Radiographic opacity
 - Facilitate root-end development
 - Provides thorough canal disinfection
 - Superior handling properties

- Packing Options:**
- 2 gr syringe
 - 2 gr syringe x2
 - 2 gr syringe x4

DentryX Fiber Post

A universal resin glass fiber post system designed for esthetic, metal-free restorations. Available in various diameters: 1.0mm, 1.2mm, 1.4mm, 1.6mm, and 1.8mm to suit diverse clinical needs.

- Features:**
- Radiopaque
 - Equipped with 4 drills for versatile use
 - Cone-shaped tip
 - Superior durability
 - Color marked
 - Designed for seamless integration with adhesive resin cements

- Packing Options:**
- DentryX Fiber Post Kit: Contains 5 posts each of 1.0mm, 1.2mm, 1.4mm, 1.6mm, and 1.8mm diameters, along with 4 assorted drills.”
 - Refills: Available for individual sizes:
 - 5 pcs. 1.0mm posts
 - 5 pcs. 1.2mm posts
 - 5 pcs. 1.4mm posts
 - 5 pcs. 1.6mm posts
 - 5 pcs. 1.8mm posts

DentryX %17 EDTA Gel

It is a 17% EDTA-based root canal preparation gel designed for effective lubrication and cleaning of root canals. Comes complete with convenient application tips for precise delivery.

- Features:**
- Smooth-flowing
 - Strong antibacterial performance
 - Minimize instrument fracture

- Packing Options:**
- 3 ml syringe
 - 3 ml syringe x2
 - 3 ml syringe x4

DentryX Chlorex Gel

DentryX Chlorex Gel is a 2% chlorhexidine gel specially formulated for effective root canal preparation.

- Features:**
- 2% chlorhexidine gluconate solution
 - Effortless endodontic treatment
 - Reduced risk of root canal instrument fracture

- Packing Options:**
- 2 gr in a syringe
